Hello Scott,

I am in receipt of the May 3, 2017 correspondence, *"Review of Memorandum from Mark Fisher, The ELM Group, to Kevin Schick of NJDEP (sic), March 9, 2017, RE: Summary of NJDEP Technical Consultation Meeting – February 21, 2017 Regarding the Hatco Corporation Remediation Project, Fords, Middlesex County, New Jersey, NJDEP PI#G000003943."* Mark Fisher is the LSRP retained by Weston for the Hatco project and the memorandum that is the subject of your correspondence relates to a Technical Consultation held on February 21, 2017. You have been retained as the LSRP for the adjoining Former Nuodex/EPEC Polymer site (PI# G000001659) and any comments you may have regarding the work of Mark Fisher, LSRP for Hatco, should be brought to his attention and not sent directly to me. Under the LSRP program the NJDEP does not intervene where disputes or differences in opinion between LSRPs occur. Such disputes are more appropriately resolved through the LSRPA Dispute Resolution process (<http://www.lsrpa.org/dispute-resolution>).

I do want to point out that the body of your memo correctly indicates that LSRP Fisher is with The ELM Group, the cc list at the end identifies him as being with ERM, an entirely different consulting firm. I would ask you to confirm that LSRP Fisher received a copy of this correspondence.

Kevin Schick
